PROFESSIONAL EXPERIENCE

Service Desk Associate Mar 2026 – Present
University of Miami Information Technology Systems

- Deliver Tier 1 phone support to faculty, staff, and students across a large enterprise environment, focusing on first-contact resolution for account access and authentication issues.
- Perform password resets, Duo MFA enrollment and recovery, and account re-enablement using , SailPoint, and CyberArk.
- Document incidents and service requests in ServiceNow with accurate categorization, clear resolution notes, and timely escalation to Tier 2 teams.
- Support users within Citrix and Profisee environments; quality monitored through NICE call recording to meet compliance standards.

Customer Care Specialist Jan 2026 – Mar 2026
Coolibar | Miami, FL

- Handled high-volume customer inquiries across phone and email on a rotating shift schedule while maintaining response-time and quality targets.
- Navigated order management and CRM tools to resolve billing, shipping, and product issues on first contact where possible.

Customer Support Representative Oct 2024 – Apr 2025
CPA Site Solutions | Miami, FL

- Managed 50–80 inbound technical calls and 40+ resolution emails weekly through Salesforce, sustaining metrics through peak tax-season traffic.
- Modified client websites with direct HTML and CSS edits; configured and troubleshot DNS records (A, CNAME, MX) across multiple registrars to maintain uptime and email deliverability.
- Partnered with an 8-person support team and Senior Analysts to escalate complex technical incidents.

Customer Support Representative Apr 2024 – Oct 2024
Heads or Tails Seafood, Inc. | Miami, FL

- Processed high-volume ticket sales, maintained accurate inventory and customer records, and performed in-house hardware maintenance on office printers and peripherals.

TECHNICAL PROJECTS

Project ISAC — Enterprise Home Security Lab Ongoing

- Virtualization cluster on Proxmox VE with pfSense firewalling and TrueNAS centralized storage and automated backups.
- Integrated Wazuh (SIEM/XDR), Snort (IDS), and Velociraptor (DFIR) to practice detection, monitoring, and incident response.
- Built a local AI monitoring service using Ollama and custom Python scripts to track server health and resource usage.

Active Directory Lab Environment Self-paced

- Deployed Windows Server 2019 domain controller with full AD DS; joined Windows 10 clients to simulate OU structure and Group Policy.

EDUCATION

B.S. Cybersecurity — Miami Dade College April 2026
A.A. Computer Information Systems — Miami Dade College May 2024
